

Eurocenter

Eurocenter DDC Ltd. in operation since 2000, is an ISO 9001:2000 and CMMI level -3 certified software engineering organization of international repute with offices based in Colombo, Sri Lanka and Oslo, Norway. Eurocenter believes in empowering customers to succeed in the Global IT economy by offering a dedicated off-shore delivery model based on 'Extended Engineering'.

Specialisation

We provide Software Development service and Quality Assurance and Testing Services to Independent Software Vendors (ISV) and Enterprise customers.

Software Product Development

Our services aim to accelerate the creation of software products, reduce time to market and help make schedules predictable in order to better manage resources, predict costs, and reduce market and technology risks.

By providing our customers with the highest-skilled teams, we can ensure the quality and reliability of the products we build. Delivering quality products goes a long way in reducing future costs. The approach is to prevent faults rather than detect and rectify them.

Quality Assurance and Testing Services

Eurocenter has a well-equipped infrastructure and a proven methodology to provide software product testing services in controlled environments. Our offerings include Set up of Test Environments, Functional Testing, Performance Testing, Compatibility and Interoperability Testing (eg. operating systems, browsers, firewalls, partner software, etc). Eurocenter develops graded test cases that can be effectively used to get the maximum test coverage within the limited time period available. Our testing processes conform to ISO 9001: 2000 and CMMI quality standards

Sector Focus

Mobile Computing

Eurocenter is uniquely positioned to help you get your product mobile enabled through our focused mobile development units. Our mobile enablement services specifically allow you to ingest, catalog, store and deliver content to various mobile handsets and platforms. Our wireless solutions are designed to help integrate wireless connectivity to business solutions by extending Web-based applications and content to the broadest range of wireless devices and network.

Information Security

We provide consultancy as well as tailored solutions to enable companies to protect information and information systems from unauthorized access, use, disclosure, disruption, modification or destruction.

Debt Management and Financial System

Functional and technology requirements of our clients are addressed by domain experts who use best practices and processes when developing solutions. We have proven expertise in developing Ledger handling, Case handling, Accounting functions, Customer Care, Invoicing, Debt collection process engine, and Auction solutions for varied clients.

Customer Relationship Management

We work with one of Europe's leading CRM Company's as a development partner. We provide software development as well as testing services. We also provide them with the domain expertise which we have gained through the years.

Products/Services

EC Frameworks

EC Frameworks are a set of re usable software subsystems with a code base that can be easily integrated to any business application to provide value and functionalities in the areas of Business Intelligence, Reporting, Web Portals Portal and Search. EC Frameworks has been designed by adopting and incorporating the advantages of both bespoke and off the shelf software functionalities.

Applications Management

Our application maintenance process covers Bug Fixing and the Enhancements of existing products. Enhancement services include enhancing Functionality, Usability, Documentation, Performance, Integration and Design (refactoring). Functionality enhancements include building ad-on module as an extension to the existing application

Software Product Development

Our product development services are designed to assist Start-up and mature software product companies through all phases of a product's life cycle.

Platform Migration

Eurocenter strongly believes that migrating to a new platform is not just making the same functionality available on a new platform. It is an opportunity to deliver better value to your customers through a fundamental reassessment based on the new platform. We have enabled several technology companies to migrate their legacy products to state-of-art technologies.

Key products include

- Microsoft Dynamics GP,
- Microsoft Dynamics CRM,
- Microsoft SharePoint.
- Microsoft Windows Mobile.
- Open Source
- Symbian
- JAVA

Key Benefits

- Mutually beneficial long term strategic alliances and partnerships with Independent Software Vendors.
- Access to our network in the Asian region to market UK and Irish software products.
- ISO 9001:2000 and CMMI level 3 Certified process
- Microsoft Gold Certified Partner
- Successfully delivered over 100 projects to European clients in the last decade.

Sri Lankan Clients

We have a strong presence in the Asian region which would be of potential use to European ISV's to channel their products.
